one of them?

Thank you Alison for your help
and the spark I needed!

It was an easy decision to taking
on another of your courses Alison.
I really felt I learnt so much with you, I truly feel I am at the
beginning of my art journey through your tuition and I am getting
more joy from my painting with your workshop, whereas before, I
was frustrated and unhappy with everything I painted, I was feeling
like I really should give up as I'm not good enough.

I just finished an online watercolour course with Alison. The course
was stellar, well organized with the right amount of material to
work through. Alison's feedback on my work as well as any
questions that I had was always helpful. A great class!

This is the best explained watercolor video that I have seen on
you tube! Thanks a million...I will be watching all your videos
from now on.

This pocket rocket of a teacher helped me understand this mercurial medium, not to tame it, but to use it's wildness to paint your story. This, together with instruction on tone, colour, composition, what brushes and paper to use, set me on a course for which I will always be eternally thankful to Alison, she made me leap....thank you Alison.

Alison is a kind, passionate and patient teacher. Exactly who I needed as I first began to dabble in watercolors. She is very technical and methodical in her teaching so that you grasp why and how to paint. Tells you what to do in a sweet way and is wonderful in returning emails and keeping up with your questions. As a new painter, I highly recommend her.

She is incredibly talented, patient and has an excellent rapport with her students.
Most importantly she helps people to develop their own style and work at their own pace.
The lessons are meticulously planned, professional and highly enjoyable.

I feel that I am finally understanding watercolors! Her critiques are great, offering constructive criticism with a gentle touch.

In summary!

below are the key words which I am honoured to be described as by my many students. Thank you!

I have 16,000 subscribers on my Youtube channel and - apparently - am in the Top 50 of tutors there! There are 60 enrolled students on my online academy - and I have taught 100's of in-person students at my local classes and workshops since 2015.

Through my watercolour tutorials for Leisure Painter magazine I reach oodles of students world-wide. Join them! and maybe you will think of another word to describe my teaching style as you learn the ways of watercolour!
